Experience

WelcomeScreen

Software Engineer

Bengaluru, Karnataka

May 2025 – Present

- Optimized core backend REST APIs through query tuning, pagination, and endpoint restructuring, **cutting average response times by 25%** and enhancing overall system performance.
- Analyzed and resolved critical production incidents using Datadog logs and traces, **reducing Mean Time to Resolution (MTTR) by 30%** and maintaining 99.9% **system uptime** standard.
- Orchestrated a seamless production data migration of over 5,000 **records with zero data loss**, collaborating across time zones with a distributed engineering team to ensure zero user downtime.

Cognisite Technologies Pvt Ltd

Full Stack Developer

Bengaluru, Karnataka

Aug 2024 – Apr 2025

- Engineered end-to-end full-stack features for multiple client-facing applications within an Agile environment, **accelerating deployment cycles by 20%** through robust frontend-backend integration.
- Developed a modular, reusable UI component library adopted across 5+ **distinct product features**, reducing duplicate development effort by 30% and speeding up frontend delivery.
- Troubleshooted and patched time-sensitive production bugs under pressure, resulting in a **20% reduction in recurring errors** and improving application reliability.

Projects

Trendsetter | Next.js, TypeScript, Express, MongoDB, Stripe, Cloudinary, Gemini AI

- Architected an end-to-end, production-ready fashion marketplace utilizing TypeScript and a secure JWT authentication system with refresh tokens, **reducing session vulnerabilities**.
- Integrated secure Stripe payment pipelines with webhook verification and implemented Gemini AI to **automate 100% of product description generation**, streamlining vendor onboarding.

Pingify | React, Express, MongoDB, Socket.io, Redis

- Developed a secure, real-time chat platform supporting end-to-end encrypted messaging, live indicators, and role-based group management for **enhanced data privacy**.
- Designed a scalable backend infrastructure using Express, Socket.io, and Redis caching, **minimizing communication latency to 100ms** for real-time notification delivery at scale.

TrackIt | React, TypeScript, Redux, Tailwind CSS

- Built a comprehensive project management platform featuring interactive Kanban, list, and calendar views, integrating visual analytics to **give teams real-time insights into project health**.

Education

Masai School

Full Stack Web Development Certification

Bengaluru, Karnataka

Aug 2023 – Apr 2024

Dr. APJ Abdul Kalam Technical University

Bachelor of Technology in Information Technology

Lucknow, Uttar Pradesh

July 2019 – July 2023

Technical Skills

Languages: JavaScript, TypeScript, Java, C++, SQL

Backend: Node.js, Express.js, REST APIs, Socket.io, JWT, OAuth

Frontend: React.js, Next.js, Redux, Redux Toolkit, Tailwind CSS, Chakra UI, Material UI, Shadcn

Databases: PostgreSQL, MongoDB, MySQL, Redis

Testing: Jest, Mocha, chai, sinon

Tools & Platforms: Git, GitHub, Docker, Vercel, Render, Datadog, Postman, Stripe

Architecture & Methodologies: System Design, Data Structures & Algorithms, Agile/Scrum, Prompt Engineering

Soft Skills: Teamwork, Attention to Detail, Time Management, Problem Solving

Certifications

Database Management Systems

NPTEL
